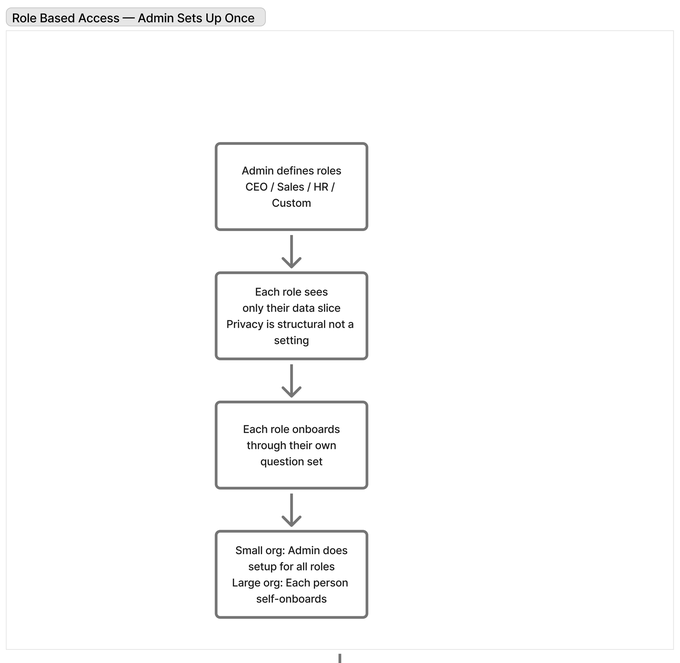
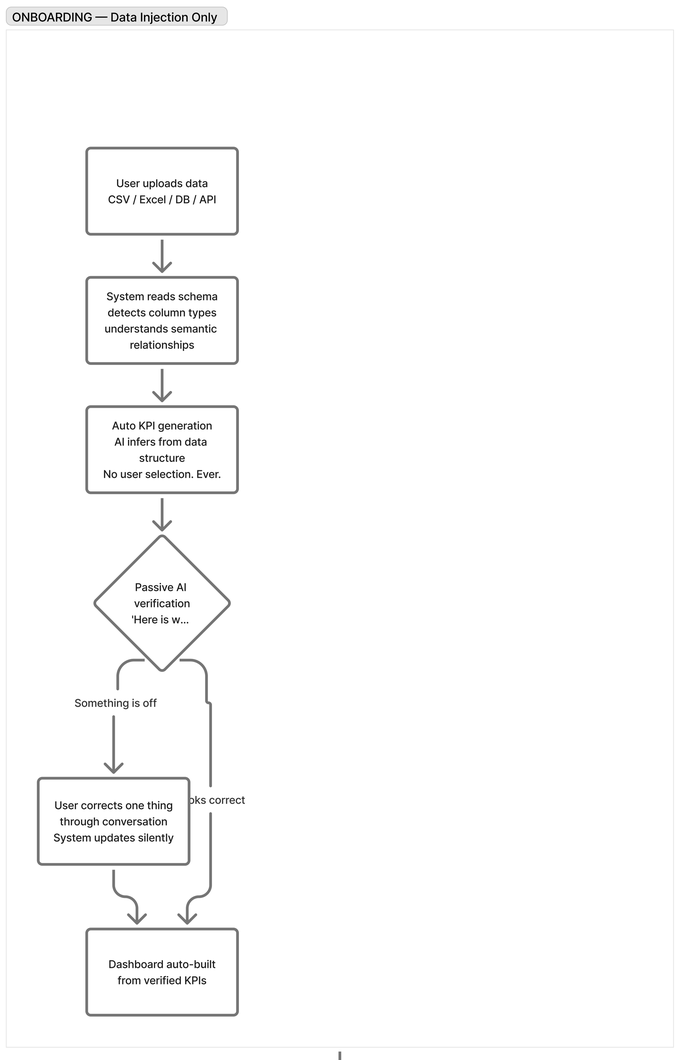
User answers
in plain language
System maps answer
to inferred KPI
System reads
inferred KPIs from data
System reads
inferred KPIs + target
context
System reads
inferred KPIs + historical
pattern
Example questions
'How are we doing?'
'Will we grow next year?'
'Is the team performing well?'...
Example questions
'How was revenue last month?'
'Which region performed best?'
'Who are my top 10 customers?'...
Example questions
'How did Q3 compare to Q2?'
'Which product missed target?'
'How did sales rep A vs B perform?'
Example questions
'Predict next month
revenue'
'Will product A sales gr...
System delivers
direct evaluative answer
Zero friction
Does system
have
target context?
No
Yes
Descriptive answer
'Revenue was ₹42L,
up 8% from last month.'
System asks once
'What is your target
for this period?'
Evaluative answer
'Revenue missed ₹50L target
by 16%. Margin is on track.'
User can update target
anytime through conversation
'New target this month is
₹55L'



Role Based Access — Admin Sets Up Once
Admin defines roles
CEO / Sales / HR /
Custom
Each role sees
only their data slice
Privacy is structural not a
setting
Each role onboards
through their own
question set
Small org: Admin does
setup for all roles
Large org: Each person
self-onboards



ONBOARDING — Data Injection Only
User uploads data
CSV / Excel / DB / API
System reads schema
